To Whom It May Concern:

If your school is like Country Garden Montessori Academy, you are challenged with finding ways to support parents in meeting the nutritional and peanut free needs of their children. Good Foods can help.

My first experience with Good Foods was when we initiated a lunch program as a fundraiser for our school. Good Foods had a wide variety of options for the students to choose from and all were very affordable. The program was easy to implement and flawlessly initiated, allowing us to support parents in offering a lunchtime nutritional option. In addition to the lunch program, I have taken advantage of some of their other product offerings such as Mr.Cookie nut-free cookies for special events and activities and they are always delivered fresh and in a timely manner.

Their processes make it easy, but it is their dedication in nutrition for today's youth that is most impressive. Good Foods has played a vital role here at Country Garden Montessori Academy and we will continue to use them in the future. Perhaps they can help you too!

Sincerely,

Jackie Counsell
Administrator
Country Garden Montessori Academy
